

Class Entry CE

Transfer to DNV Class for ships not built to DNV Class

Purpose

DNV offers Class Entry to Owners who see the benefits of having DNV class and access to all of DNV's services for their ships which were built to another class society. Approximately one quarter of the more than 5,000 ships in DNV class have been entered into DNV class after construction by Owners that have seen the added benefits of having DNV class.

Features

The local DNV Customer Service Manager will manage the class transfer to DNV, ensuring a smooth transfer with a minimum of disruption to the operation of the vessel and a minimum of involvement by the shore organisation.

The Class Entry Survey can be easily planned to fit in with the vessel's schedule due to DNV's extensive network of survey stations, and is carried out by experienced surveyors.

The Customer Service Manager and Surveyor are supported by the dedicated Class Transfer Unit at DNV's head office, which coordinates with the relevant losing class society and flag authorities and arranges for the issuance of the relevant full-term certificates.

Benefits

Class Entry to DNV is the doorway to having your ship classed by DNV, and you and your company will benefit from the support and service of one of the leading classification societies in your daily operations.

Class Entry to DNV will also give you access to DNV's Consulting Services, allowing you to use DNV's leading experts in specific fields and multidisciplinary consultants with extensive maritime experience, thus providing tailor-made and cost-efficient solutions.
